ORDER BY THE CHIEF

June 20, 2014

ORDER NO. 2014-180

**TO: Wise Services Inc.
11478 Route 45
Lisbon, OH 44432**

**RE: Wise Services Inc. Lisbon Facility
Columbiana County, Center Township**

**SUBJECT: Temporary Authorization to Store and Process Brine and Other Waste
Substances Pursuant to R.C. 1509.22**

Pursuant to Ohio Revised Code Section 1509.22, the Chief of the Division of Oil and Gas Resources Management (“Chief” or “Division”) issues the following Order:

BACKGROUND:

- (1) Wise Services Inc. proposes to operate a storage facility to be located at 11478 Route 45, Lisbon, Ohio in Columbiana County (“Wise Services Inc. Lisbon Facility”). The Wise Services Inc. Lisbon Facility is a proposed truck wash operation that involves the storage and processing of brine or other waste substances associated with the exploration, development, well stimulation, production operations, or plugging of oil and gas resources.
- (2) Division (B)(2)(a) of R.C. 1509.22 states, in pertinent part, that “On and after January 1, 2014, no person shall store, recycle, treat, process, or dispose of in this state brine or other waste substances associated with the exploration, development, well stimulation, production operations, or plugging of oil and gas resources without an order or a permit issued under this section or section 1509.06 or 1509.21 of the Revised Code or rules adopted under any of those sections.”
- (3) On March 28, 2014, the Division received an application from Wise Services Inc. requesting to store brine and other waste substances associated with the exploration, development, well stimulation, production operations, or plugging of oil and gas resources at the Wise

Services Inc. Lisbon Facility. In its application, Wise Services Inc. supplied the Division with information and details regarding its proposed operations.

ORDER:

IT IS HEREBY ORDERED:

Wise Services Inc. has temporary approval at the Wise Services Inc. Lisbon Facility to store materials associated with the exploration, development, well stimulation, production operations, or plugging of oil and gas resources, subject to the following conditions:

- (1) Wise Services Inc. shall conduct all operations in compliance with R.C. Chapter 1509 and Ohio Adm.Code 1501:9.
- (2) Brine shall not be disposed of in a manner not specified in R.C. 1509.22(C)(1)(a) through R.C. 1509.22(C)(1)(c). Disposal of brine pursuant to R.C. 1509.22(C)(1)(d) requires separate written approval by the Chief.
- (3) This Chief's Order shall terminate upon any of the following, whichever occurs first:
 - a) The Division issues a permit to Wise Services Inc. for the Wise Services Inc. Lisbon Facility pursuant to rules promulgated under to R.C. 1509.22(C);
 - b) The Division denies a permit to Wise Services Inc. for the Wise Services Inc. Lisbon Facility pursuant to rules promulgated under R.C. 1509.22(C); or
 - c) Six months after the effective date of rules adopted under R.C. 1509.22(C).

Date June 20, 2014

Richard J. Simmers
Richard J. Simmers, Chief
Division of Oil and Gas Resources Management

Addressee is hereby notified that this action is final and effective and may be appealed pursuant to Section 1509.36 of the Ohio Revised Code. If the Order is appealed to the Ohio Oil and Gas Commission, the appeal must be in writing and must set forth the Orders complained of and the grounds upon which the appeal is based. Such appeal must be filed with the Oil and Gas Commission, 2045 Morse Road, Building H-3, Columbus, Ohio 43229-6693, within thirty (30) days after receipt of this Order.

To Whom It May Concern:

RE: Stabilization of brines and other waste substances

Wise Services Inc. is receiving this letter because Wise Services Inc. has been issued Chief's Order 2014-180 to store and process brine or other waste substances pursuant to R.C. 1509.22. Division (C)(1) of R.C. 1509.22 states that brine from a horizontal well can only be disposed of by injection into a Class II injection well, in association with a method of enhanced recovery, or in a manner approved by a permit or an order issued by the Chief that authorizes an alternative method of brine disposal. If wastes containing amounts of brine are being solidified with compressible bulking agents, such as sawdust or auto-fluff, the use of such bulking agents may release brine when the waste is transported and/or placed in a landfill. In order to eliminate the release of brine during transportation or placement in a landfill, liquid and semi-solid oil and gas wastes that contain free liquids must be stabilized with Portland cement, quick-lime (CaO), and other materials that may be approved by the Chief. Stabilization with these agents binds the liquid waste component to the stabilizing agent resulting in a stable solid that passes the paint filter test.

All facilities that are operating under a Chief's order authorized under R.C. 1509.22 must ensure that all oil and gas wastes are stabilized with agents as referenced above.

Please note that the above process does not eliminate the responsibility to test for levels of radium 226 and radium 228 in all technologically enhanced naturally occurring radioactive material (TENORM), pursuant to R.C. 1509.074.

Sincerely,

Richard J. Simmers

Richard Simmers
Chief, Division of Oil and Gas Resources Management
